## *Elevate Your Digital Experiences With Content*

The Enterprise Content Management landscape is ever evolving. As more businesses undergo digital transformation, they need modern and agile ECM technology that can keep up with the changing pace. Successful companies are rethinking the workplace, processes and IT infrastructure, making the journey from legacy IT to modernized, future-ready IT that gives your business the agility to innovate.

Box is a cloud content management platform for the digital age, combining centralized, cloud-native content services with advanced security and governance. This means all your teams can easily work together in a secure environment, enabling team collaboration and mobile productivity, while modernizing business processes.

Want more customization and control? Using Box Platform, businesses can create custom digital experience solutions and business applications that leverage Box as the secure content store by taking advantage of Box Platform's APIs. This way, businesses can deliver apps faster while reducing security and compliance risk and increasing end user engagement.

## BUSINESS BENEFITS

### INCREASE USER ENGAGEMENT

Box Platform helps development teams create immersive and collaborative digital experiences with content with user-facing services delivered through its APIs that enable advanced viewing capabilities, simplified content discovery, connecting conversations with content, and accelerated collaboration process.

### REDUCE SECURITY & COMPLIANCE RISK

Box Platform is built and designed by security and compliance experts, including content services that 1) provide secure access and mitigate data loss; 2) maintain governance and compliance; 3) ensure confidentiality and integrity; and 4) meet industry and global compliance.

### ACCELERATE DEVELOPMENT TIMELINES

Box Platform provides content services for your apps, instead of having to build from scratch, along with development tools including SDKs to enable development on the platform of your choice and pre-built UI kits to easily build better user interfaces.

# HOW RIVET LOGIC CAN HELP

**Strategy** – Align business goals with Box capabilities. Configure for success, and customize.

**Implementation** – Implement your Box solution following best practices, while seamlessly integrating Box Platform into your enterprise.

**Content Migration** – Migrate existing content from legacy content repositories and/or systems into Box seamlessly and easily.

**Managed Services** – Ensure a smooth production rollout with post-production support or managed services.

## RIVET LOGIC'S BOX PLATFORM SOLUTIONS

**Video Center on Box Platform** – Whether your business uses video for corporate communications, training, or entertainment, Video Center on Box Platform provide users with easy online access to your highly secure video content anytime, anywhere, on any device.

**Document Center on Box Platform** – Support complex business processes with asset bundles containing relevant documents and digital content, and deliver them to the right audience, when and where they need it.

**Liferay and Box Platform Integration** – Enrich your Liferay powered digital experience solutions with enterprise content stored in Box.

**Wealth Management Advisor Portal** – Equip institutional financial advisors with the tools to better manage and engage with prospective and existing clients.
