

CONSULTING SERVICES

LIFERAY PORTAL UPGRADE

FULLY LEVERAGE YOUR LIFERAY SOLUTION FOR MAXIMUM IMPACT

Modern users expect a seamless experience between their desktop and mobile devices, and enterprises that do not deliver an engaging mobile experience risk losing valuable customers. Employee portals and applications are no different – businesses must deliver an effective, productive, and user-friendly mobile experience to their workforce.

Liferay Portal's latest release delivers enhanced usability and provides a comprehensive platform for building intuitive, engaging digital experiences for both employee-facing and customer-facing applications.

Rivet Logic's team of experienced consultants can help upgrade your Liferay Portal to the latest version so you can fully leverage your portal's capabilities to drive maximum engagement.

UNSURPASSED EXPERTISE YOU CAN TRUST

Rivet Logic's vast experience implementing and upgrading a wide variety of Liferay solutions has led us to recognize some general key success factors in portal implementations, which include:

- Easy to use
- Directly address the most pressing information needs
- Be social
- Be stunning
- Function flawlessly
- Solution design and information architecture excellence
- World-class Liferay technology expertise

Rivet Logic has been performing Liferay platform upgrades since version 4.1 EE. Through our experiences and clear understanding of the platform and upgrade process, we've developed a set of best practices and assets to ensure smooth implementations that also set the foundation for painless future upgrades.

- Database updates
- QA environment update
- QA environment testing and validation
- Production environment update
- Production environment testing and validation

PROJECT METHODOLOGY

To ensure a successful Liferay upgrade, Rivet Logic utilizes a seven-phase Liferay Life Cycle methodology, which is based on a modified version of Liferay's Recommended Upgrade Approach.

After completion of each phase, Rivet Logic will work with customers to review the deliverable and ensure all milestones are properly met.

QUALITY ASSURANCE

Quality Assurance plays an enormous role during an upgrade project. It's imperative that a QA environment is set up properly for test teams to run through both pre-upgrade and post-upgrade testing scenarios. Rivet Logic will work with our customers to review and ensure that all User Acceptance Tests are up-to-date for testing the upgraded environment.

Rivet Logic utilizes various industry-standard testing tools, including jUnit, jMeter, Selenium, and Selenium Grid.

RESOURCES

At Rivet Logic, all of our professionals have extensive experience developing, deploying and supporting enterprise solutions. In everything we do, we focus on adding value to our clients' businesses and organizational goals. We take pride in our extensive technical expertise, and we understand that it is only of value when we deliver bottom-line results to our clients.
