LIFERAY MIGRATION (.NET)

SMOOTH MIGRATIONS FOR MAXIMUM BUSINESS VALUE

Migrating between applications can be a daunting task, you want to make sure all of your company's critical assets, business processes, and integrations are migrated safely and securely, while providing a seamless experience for your end users. Rivet Logic's migration methodology and approach leverage proven industry best practices, ensuring our customers delivery of the most successful migrations possible. Our Liferay migration expertise includes migrations from Oracle WebCenter, Teamsite, Sharepoint, Drupal, Salesforce, and more.

OBJECTIVES & GOALS WITH CUSTOMERS IN MIND

Performing an application migration requires planning and a well thought out strategy. Rivet Logic's goal is to help our customers achieve the following objectives:

- Eliminate redundant or obsolete applications
- Reduce the complexity of the application portfolio
- Reduces the TCO of the IT infrastructure
- Increase strategic flexibility to pursue new business opportunities
- Improved efficiency

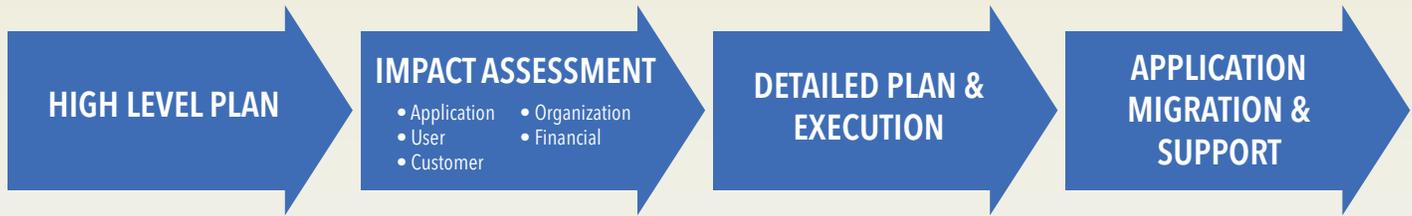

We work collaboratively with each customer to evaluate existing systems and business processes to determine the right Application Migration strategy - identify opportunities, estimate cost, assess impact, estimate value, and develop business case for new initiatives.

Our Migration Assessment deliverables include:

- List of Application Migration opportunities
- Risks and Mitigation
- Migration Strategy and Level of Effort
- ROI Analysis
- Business Case

APPLICATION MIGRATION APPROACH

Rivet Logic has evolved our best practices to develop an Application Migration Approach to include four steps - High Level Plan, Impact Assessment, Detail Plan & Execution, and Application Migration Support.

High Level Plan - The high level plan is developed to ensure an orderly transition. These include:

- Migration Timelines
- Software release plans
- Critical and non-critical bug-fixes
- Notification and announcement content and briefs
- Financial briefs
- Customer support and professional services support
- Employee/customer training materials

Impact Assessment - Migrating an application impacts the application itself, internal users, customers, the organization, and the bottom line.

Impact Assessments include examining:

- System Interfaces
- Data Flows
- Existing and pending contracts
- Stake holder needs
- Development, support and service plans
- Migration requirements
- System Replacement/Retirement plans
- Financial analysis (TCO)
- Risk analysis

Detail Plan and Execution - The detail plan is finalized and executed. This includes:

- Approvals - Functional, Operational, IT, etc.
- System Interfaces
- Prepare for Migration
- Experiment & Demonstrate (Dress Rehearsal)
- Improve Retirement Plan (Go/No-go)
- Mitigation plan

Application Migration and Support - In this phase, the new application is deployed live and existing application is retired. This includes:

- User, customer and Organization expectations are managed.
- Notify Users for Retirement.
- Retire Old Application Environment
- Archive, Secure & Dispose
- Implementation is carried out with associated business process reengineering.
- Post decommissioning support and documentation

SUCCESSFUL LIFERAY MIGRATIONS FROM:

- .NET
- Oracle WebCenter
